DOE/RL-2000-43

Review of Generation and Flow of Recycled Uranium at Hanford

Richland Operations Office

June 30, 2000

Acknowledgements:

Although there were one or more initial authors for various portions of Hanford's "Review of Generation and Flow of Recycled Uranium at Hanford" report, the actual process was highly iterative in that most of the team members listed below (and others on the DOE-HQ Working Group and senior RL management) reviewed, edited, commented and otherwise made significant contributions to several if not all sections of the final report. In addition, in the course of researching and preparing this report, many individuals and groups not specifically listed below provided invaluable services to this project in advising team members of the existence of and assisting in locating, acquiring, and interpretation of various documentation covering Hanford's 50+ years of operation. Principal contributors to this study included:

Department of Energy

James E. Mecca – RL Project Manager, Uranium Mass Balance Project
Angel Joy – RL Deputy Project Manager, Uranium Mass Balance Project
Gail M. Splett – RL Database Research and Support/Office of Chief Counsel
Lupe Ellingson – RL Safeguards and Security
Ricky L. Stutheit – RL Safeguards and Security

Contractor Support

Fluor Hanford
Ronald R. Borisch – Project Manager
David A. Dodd
Alan A. Grasher
Richard C. Hoyt
Gary B. Hulse

Informatics
Arthur J. Gutzman Jr.
Sarah L. Davis
